# COMMERZBANK DRIVES REDUCTION IN OPERATIONAL AND MAINTENANCE IT COSTS WITH JIVS

As an effective provider of financial services to private and corporate customers as well as institutions in Germany and worldwide, the bank has global presence in the key business and financial centre's. Due to the acquisition of the Dresdner Bank by the German Commerzbank, the entire IT-Landscape needed to be consolidated and restructured.

**“Complete retirement of over 200 different legacy systems with JIVS History, resulting in high reduction of operational and maintenance costs.”**

**Ralf Mattes**  
Senior Account Executive  
Data Migration International

## SITUATION

- Identification of 250 legacy systems (individual software)
- Historization of TBs data located on many different technologies such as Mainframe, Unix, Windows
- Transfer applications and data into a common structure by keeping compliance over 10 years
- Coordination with the central IT project and project size itself
- Meet GDPR requirements

## SOLUTION

- Complete retirement of over 200 different legacy systems within 1.5 yearstime period powered by JIVS History
- Set up Factories for Assessment, Conception, Transformation, Testing and acceptance by auditor
- Classification of legacy systems and transformation complexity into basis, advances and complex
- Providing a unique/common technical infrastructure and user interface
- Use JIVS Retention Management to securely delete personal data

## BENEFITS

**Minimize business risk due to harmonization of data structure and single application know-how**

**High reduction of operational and maintenance costs (three digit Mio)**

**High data security in JIVS History by encryption**

**GDPR Compliance for historical data**
