Food & Beverage

COUNTRY:
USA

Campbell's

FROM OLD SYSTEMS TO NEW VALUE – TODAY AND IN THE FUTURE

Campbell's (also known as Campbell Soup Company) is an American processed food and snack company. The company is most closely associated with its flagship canned soup products; however, it has through mergers and acquisitions grown to become one of the largest processed food companies in the U.S.

"With JIVS IMP, we were able to transform the client's systems landscape – for today but also for the future. Moving from a complex legacy infrastructure to a single integrated platform, Campbell's can now easily access its valuable historical data. Compliance is guaranteed and costs are dramatically down."

Jean-Marc Pestoni
Data Migration International

SITUATION

- A total of approximately 100 Legacy Applications and Systems storing approx. 120TB of Data
- Mix of on-premise and different cloud solutions
- Applications mainly kept because of legal and compliance reasons
- High cost for Infrastructure, licenses, ongoing support & maintenance agreements
- Complex support organisation and systems landscape
- Limited reusability of data

SOLUTION

- Decommissioning of Legacy Systems and Applications into one single solution – JIVS IMP
- Access to all retired Systems and Applications for all users through one known interface and solution
- One integrated platform that could potentially also support future Mergers & Acquisitions (carve-ins/ carve-outs)

BENEFITS

-  **Historization of legacy data in-line with the tax compliance and business requirements for sensitive data**
-  **Easy access to all data – JIVS IMP becomes single-source-of-truth for historical data**
-  **Significant costs saving**
-  **Developed standard procedure and processes for decommissioning of (future) "inherited" Applications and Systems**
-  **Fully compliant with international guidelines including ability of tax and/or legal holds**
