

**USE CASE:**  
Application retirement

**INDUSTRY:**  
Chemicals, Science & Technology

**IMPLEMENTATION PARTNER:**  
Accenture

**REGION:**  
Global

**“This project was a textbook example of what’s possible through true partnership. Together with Accenture, we helped DuPont retire 17 SAP legacy systems in record time. Seamless collaboration, clear accountability, and mutual trust were key to delivering extraordinary results.”**

## DUPONT RETIRES SAP LEGACY SYSTEMS IN RECORD TIME WITH JIVS IMP AND ACCENTURE TO POWER GLOBAL TRANSFORMATION

DuPont, a Fortune 500 global leader in science and industrial innovation, was burdened by a fragmented IT landscape after a decade of mergers, divestitures, and a strategic corporate split. Their teams were forced to maintain 17 outdated SAP legacy systems—just to meet audit and compliance requirements—draining resources, increasing cybersecurity risk, and hampering agility.

### CHALLENGE

- Fragmented IT landscape due to ongoing mergers, divestitures, and business splits.
- 17 aging SAP systems maintained solely for audit and compliance purposes.
- High operational costs, cybersecurity risks, and growing technical debt.
- Need for audit-proof, long-term access to over 50 TB of historical SAP data.
- Sustainability pressure to reduce IT-related energy consumption and emissions.

### SOLUTION

- Strategic partnership between DuPont, Accenture, and Data Migration International.
- Deployment of JiVS IMP, a certified, end-to-end platform for:
  - SAP system decommissioning
  - Compliant data archiving with business context
  - Automated One Click Transformation™
  - Long-term GDPR-ready access to historical data
- Rapid migration of 50+ TB of data with 2,000+ SAP business object templates.

### BENEFITS

-  **17 SAP systems decommissioned in just 12 months — industry-leading timeline.**
-  **Audit-ready and fully compliant (IDW PS 880 certified).**
-  **Significant IT cost savings and elimination of legacy infrastructure. Environmental impact reduced by retiring outdated, energy-intensive hardware.**
-  **Greater agility and scalability to support DuPont’s evolving business strategy.**
