PHILLIPS 66 SIMPLIFIES COMPLIANCE AND CUTS IT COSTS

Phillips 66 is a leading energy manufacturing and logistics company headquartered in Houston, Texas, USA. It operates across the entire oil and gas value chain, including Midstream, refining, chemicals, and Marketing & Specialties. With thousands of fueling stations across the U.S. and global operations, Phillips 66 plays a crucial role in powering mobility, industry, and commerce.

“With Jivs IMP, we helped Phillips 66 retire a compliance-critical application quickly and securely— without disruption to the business. This project not only reduced legacy complexity and costs but also laid the foundation for broader IT modernization.”

Jean Marc Pestoni

CHALLENGE

- PeopleSoft system kept running solely for legal compliance, despite no longer being in operational use.
- Rising infrastructure and support costs tied to non-essential legacy systems.
- Pressure to reduce IT complexity and prepare for broader cloud modernization.
- Required full, audit-compliant access to legacy data without maintaining old systems.

SOLUTION

- Standalone application retirement initiative (outside of S/4HANA program).
- Jivs IMP deployed by Data Migration International as the sole implementation partner.
- Rapid separation and archiving of historical PeopleSoft data.
- Secure, compliant access to 100% of historical data post-retirement.
- Minimal business involvement through automation and standardized processes.

BENEFITS

Substantial reduction in application-related IT costs.

Complete decommissioning of PeopleSoft system within months.

Full compliance with retention and audit requirements.

Enhanced IT agility and reduced landscape complexity.

Positive feedback from end users on simplicity and ease of data access.
