

USE CASE:

M&A – Data Carve-Out & Long-Term Access

INDUSTRY:

Medical Technology

COUNTRY:

North America

Implementation Partner:

Capgemini (Program Lead)

RAPID, COMPLIANT DATA CARVE-OUT FOR A GLOBAL SPIN-OFF WITH JIVS IMP

When global medical device leader BD (Becton, Dickinson and Company) spun off its diabetes care division to form Embecta, the newly independent company needed fast, secure access to historical data. The challenge: carve out Embecta's business data from BD's SAP landscape during a parallel S/4HANA migration—without disrupting compliance, operations, or delaying go-live.

“Access to historical SAP data without the overhead of running a full legacy system was a critical success factor for Embecta. JiVS IMP made this possible - fast, compliant, and user-friendly.”

SITUATION

As BD spun off its diabetes care business to create Embecta, the new company faced urgent IT requirements:

- Carve out legacy data (~1 TB) specific to Embecta from BD's SAP ECC
- Ensure full compliance with global legal, tax, and audit requirements from Day 1
- Guarantee secure, audit-proof access to historical data
- Avoid business disruption during BD's SAP ECC to S/4HANA migration
- Enable intuitive access for non-technical end users (Finance, Tax)
- Deliver results quickly under M&A time constraints

SOLUTION

With Capgemini as program lead, Embecta selected JiVS IMP, deployed in a private cloud setup, to separate and retain historical SAP data in a compliant and user-friendly environment:

- Secure separation of historical data from BD's SAP ECC system
- Centralized, cloud-based archive with 24/7 access
- Out-of-the-box tools for intuitive user access
- Full business context and legal auditability preserved
- Automated support from DMI and Capgemini for rapid delivery

BENEFITS

-  **Go-live in just 11 weeks — rapid execution without compromise**
-  **Full compliance with audit, tax, and legal requirements**
-  **Positive user feedback on intuitive access to historical data**
-  **Secure, centralized data archive now fully owned by Embecta**
-  **Predictable IT costs, with no need to operate legacy systems**
-  **Zero business disruption — historical access ensured without affecting BD's S/4HANA migration**
