

**USE CASE:**  
S/4HANA Transformation

**INDUSTRY:**  
IT Services / Cloud Integration

**REGION:**  
North America

# ACCELERATE YOUR SAP S/4HANA JOURNEY: THE POWER OF SMART DATA AND STRATEGIC READINESS

**Integrity Resource Management** bridges strategy and execution to ensure SAP S/4HANA transformations are delivered on time, on budget, and with measurable business value. By aligning people, processes, and technology, Integrity enables organizations to turn strategic vision into sustainable operational success.

## SITUATION

### Complex S/4HANA Migrations Need More Than a Technical Plan

- Enterprises face ballooning costs, complex legacy data, and compliance pressure.
- **80%** of project delays are caused by unprepared data, poor system strategy, and misaligned business priorities.
- Organizations need a clear Phase 0 foundation that unites data readiness and strategic readiness before technical migration begins.

## SOLUTION

### One Integrated Approach – Strategy + Technology

#### Integrity Management's Approach:

- Brings a CIO-level roadmap for SAP transformation, ensuring executive alignment, governance, and business case definition before project kickoff.
- Focuses on Phase 0 readiness: business value mapping, program design, and risk mitigation to avoid “costly re-starts” mid-migration.
- Proven framework to shorten program setup by up to 30% and align all stakeholders around measurable transformation goals.

#### Data Migration International's (DMI) Approach:

- Delivers the technical engine behind a clean, compliant, and sustainable transformation.
- One Click Transformation™ separates operational and historical data to reduce data volume by up to 90% — cutting migration effort and costs by up to 80%.
- Enables legacy system decommissioning while ensuring 100% secure access to historical data for audit, tax, and compliance.
- SAP-certified and trusted by global leaders such as DuPont, Bühler, and Arbonia.

## THE IMPACT

### Joint Value Proposition

- Unified methodology: strategic advisory (Integrity Management) + data execution (DMI).
- Rapid, low-risk migration to SAP S/4HANA with measurable ROI.
- Clean data, clean core, sustainable IT footprint.
- Enables CIOs to shift resources from system cleanup to innovation and AI-readiness.

## WHY IT MATTERS

### Key Benefits

- Up to 90% data reduction
- 80% lower operating costs
- End-to-end compliance
- Strategic readiness
- Sustainable transformation

### Result

- Leaner, faster S/4HANA migration**
- Legacy systems retired securely**
- Audit-proof data lifecycle**
- Avoid project overruns and scope drift**
- Lower IT energy use, smaller carbon footprint**
